Introduction

“A strong resume can help in gaining access to new opportunities. It is considered as the first step towards achieving professional career goals.”

This web application will simplify the task of creating a resume for individuals and students which is user friendly and easy to access. The purpose of the application is to provide an easy means for creating professional looking resumes and cover letters.

Users must simply complete a form that includes information from all needed fields, including educational questions, skills, others. The form filled by the users are saved, and the system generates a well-structured resume automatically and can download the resume in pdf format.

Core Features

1. **Landing Page:** Explain the purpose and functionalities of the website. Provide options for the user and contains sample templates.
2. **Create Resume Page:** Allows user to create a new resume by selecting the options provided based on user professional experience.
3. **Create Cover Letter:** Allows user to create cover letter by selecting a template.

4. **User Profile:** The information that is stored when user created an account can be viewed here. The user will also have the option to upgrade to the premium account.
5. **Final Page:** Resume/cover letter created can be viewed on this page. This page will have options to download. However, once user leave the page, then user cannot download unless they upgrade their account to premium.
6. **Previous Files:** User can view the files that are created in the past. Can download the files only if the user has premium account.
7. **Contact Us Page:** Provides contact information to the user and allows to send an email for support and few FAQs

Extra Features

1. Allow users to create premium account for additional privileges
2. Review and rating of the website
3. Social media links of the website that navigates to the site.
4. Professional review for the created resume.
5. To download .doc files as an option for the premium members.
